

# Wood - A Natural Material

Wood has a character, style and versatility that no other material can match. It's a natural product that we feel comfortable living with in our homes. Sustainable and renewable it's warm and beautiful, with good acoustic properties and available in a range of paint and stain finishes. Wood can provide the perfect solution for every type of window or doorsets.

## Raising The Standards

Our mission is to supply the market with better designed, better specified and better made timber windows and doors that will add prestige and value to the discerning build. Our range is manufactured from knot-free timber, engineered to minimise warping and twisting, and supplied fully finished and glazed for minimum fuss on site.

All of our products are fully warranted and guaranteed to ensure piece of mind when choosing the right supplier.

## Product - Features & Benefits

	Features	Benefits
Timber	Engineered timber i.e. multi-layer timber sections with opposing grains used as standard throughout our range. Knot and defect free timber.	Unlike common softwood, engineered timber resists warping and twisting. Thereby eliminating the cause of windows and doors binding. Much greater dimensional stability.
Sustainability	The timber used are from managed plantation and procured ethically.	Reassurance for consumers. Feel good factor.
Profiles	Chamfered.	Aesthetically attractive feature that enhances the look of our products.
Finish - Paint	Factory applied micro-porous paint finish to provide maximum protection with minimal maintenance.	Up to 8 years between re-decorating cycles, redecoration is simple. Timber protected from moisture absorption and ensures longevity. Reduces installation time on site. Aesthetically pleasing high quality finish. Once fitted the job is done.
Finish - Stains	Factory applied stain finish.	Up to 5 years between re-decorating cycles. Timber protected from moisture absorption and ensures longevity. Reduces installation time on site. Aesthetically pleasing high quality finish.
Glazing	Internally beaded.	Peace of mind and security.
Glass	24mm (4/16/4) glazing as standard with soft-coat low E, argon filled sealed units, warm edge spacer with a wide choice of glass.	Enhanced insulation, energy saving, noise reduction, safety.
Locking	ABI approved multi-point locking mechanisms.	High security and peace of mind.
Guarantees	Comprehensive guarantees.	Consumer confidence and safe in the knowledge that products are fully backed by manufacturer's warranties.
Made to measure	All frames are made to measure as per individual projects.	Customers are assured that frames are made to their exact requirements. Confidence and assurance obtained knowing that products have not been stored on a shelf for long periods.
Lead times	Competitive and consistent lead-times.	Provides certainty thereby allowing installers to be flexible and to plan their fitting schedule with confidence.
